

Cloud Communications Cloud Fax

Many organizations still heavily rely on faxing as a form of reliable and secure communications — Cloud Communications Cloud Fax takes the hassle out of sending and receiving faxes. Running in parallel with traditional stand-alone fax machines, Cloud Communications Cloud Fax eliminates the need to print every document manually to send or view it. It's easy to send and manage most content as electronic documents.

Cloud Communications Cloud Fax, part of Cloud Communications Cloud UC service, allows users to send and receive faxes using a printer/scanner, computer or mobile device. It provides the flexibility of sending a fax from anywhere - all from Cloud Communications's carrier-grade cloud communications service.

Sending Faxes

Gone are the days of faxing a photocopy of a signed document only to have it arrive unreadable at the other side. Subscribers can fax original files directly from a computer or printer/scanner or use a connected cloud file storage service such as SharePoint, OneDrive, Google Drive, or Box. They can even send fax documents using the camera on their smartphone. Of course, Cloud Communications Cloud UC also supports traditional fax lines and fax machines that work alongside the Cloud Communications Cloud Fax service - giving you the best of both worlds.

Receiving Faxes

You no longer have to stand by the fax machine waiting for an important fax to come in. Cloud Communications Cloud UC lets you receive and view faxes via e-mail, smartphone app, or from the Cloud Communications web portal. The business traveler can use Cloud Communications Cloud UC to receive, review, and forward faxes all without needing a fax machine.

Security and Reliability

Cloud Communications Cloud UC provides carrier-grade telephony and Unified Communications services. Hosted in top-tier geo-redundant data centers throughout the world, Cloud Communications Cloud UC provides 99.999% uptime and is monitored twenty-four hours a day by Ribbon Operations. This means that you can count on your faxes being delivered reliably and stored securely.
